My favorite subject at school is language arts. Ever since I was just a little kid, I have absolutely loved writing. I would make up stories every day and write them down in a book. Can you imagine how I felt when I found out that you actually get graded on writing at school? Most people hate language arts because it is a difficult subject to master, but thanks to my amazing language arts teachers who have helped me prosper through the years and my own hard work and dedication, I fully understand what is going on in

this class. Having this class once a day gives me an opportunity to express myself and what I know through words that are sometimes hard to say out loud. I can use the lexicon that I have stored in my head that I normally don't use when I'm talking to someone. Therefore, language arts is my favorite subject because the class allows me to practice a skill I use daily for formal occasions or just to escape reality.

The best thing about art is you can customize your paper or canvas however you like. That's why art is my favorite subject, what's yours?
