

# What are some ways we can protect our environment?

Ways to protect our environment are picking up trash, growing plants, and not littering. I would pick up trash because it would make animals not eat it. The people would be happy. It would brighten their day. I would grow plants because if people didn't have any food I would let them pick in it. They would be healthy. They would feel good. I would not litter because it would make animals get sick. So don't litter. Never litter! Those are some ways to protect our environment.

**Cash Jones, 2nd, Hilton Elementary, Mrs. Edwards**

Some ways I can protect the environment are: Stop throwing stuff in the ocean. Make electric cars. Stop polluting the air. Stop throwing stuff in the woods. Stop cutting down trees.

**Jordan Brooks, 5th, Elydale Elementary, Mr. DiVirgilio**

Have you ever wondered how you can protect our environment? One way is to not drive automobiles as much. You could walk or ride a bike instead of polluting the air with gases that don't belong. You can also not litter. You could find trashcans instead of throwing trash on the ground. You could clean up the trash on the ground, too.

**Olivia Rutherford, 8th, Jonesville Middle, Mrs. Brooks**

If I could protect our environment, I would pick up trash. If you throw trash on the ground, you may kill plants and animals. Plants and animals help our environment, that's why we need them alive. I would also start a program to help our environment. This is how I would protect our environment.

**Mario Atkins, 6th, Weber City Elementary, Mrs. Sanders**

We need to save our planet! Every day more and more trash is being littered into wildlife. We need to recycle or reuse. We need to try to encourage people to plant more trees, clean more ponds, and not to throw out their trash. Help save our planet!

**Cade Holton, 4th, Miller Perry Elementary, Ms. Jeffers**

I can help protect the Earth by recycling, not littering, and cleaning up trash.

**Savanna Bolling, 2nd, Nickelsville Elementary, Mrs. Gilmer**

One way we can protect our environment is to not throw your trash in the road. Also, pick up your trash. Recycle bottles and paper and help pick trash up off the roads. And don't put stuff on the roads. Keep all the water clean.

**Madison Barnes, 5th, Elydale Elementary, Mr. DiVirgilio**

Some ways I can help protect our environment are to pick up trash, don't litter, and find other transportation. I pick up trash every day. I put it in the trash can or in the recycle bin. I don't throw trash on the ground; it's called littering and it is not good for our land or animals in our environment. Cars put out pollution and to help that, I could ride my bike and walk places instead of using a car. If more people would do this it would be great. This is how I can help protect our environment.

**Rion Gonzalez, 2nd, Hilton Elementary, Mrs. Rhoton**

We can protect our environment by recycling all kinds of trash around trees, bushes, and lakes.

We'll also have "no poaching" signs to keep hunters away from rare animals.

**Eyan Bradley, 8th, Jonesville Middle, Mrs. Brooks**

Our environment is important to us and the animals. We need to protect it. I'd pick up trash from the lake to save the fish. I would not dump stuff in the soil, too. Everything I collect I would give to be recycled to make new things. That is how I would help the environment.

**Maddie Watts, 1st, Hilton Elementary, Mrs. Light**

Today I am going to tell you some ways to help our planet. We could not litter. We could reduce, reuse, and recycle. Also, pick up trash. I hope you liked it and you should not pollute our planet.

**Jackson Light, 4th, Miller Perry Elementary, Ms. Jeffers**

A way to protect our environment is to throw away our trash. Don't just throw it on the ground, but put it in the trash can. When you see trash on the ground, throw it away, even if it's not yours. When you do that, it saves animals' homes and their lives. So next time you have trash, don't throw it on the ground, throw it in the trash.

**Madeline Perry, 6th, Weber City Elementary, Mrs. Sanders**

There are many ways I would help the environment. One way is to recycle paper and plastic. I am in my school's recycling club. Also, we could use less fossil fuels and use other sources of power, like water, wind, and solar. Those are some ways I would help the environment.

**Connor Ketron, 6th, Yuma Elementary, Ms. Mullins**

One way we can protect our environment is we stop the use of gasoline. Another one is we can start picking up the trash in our environment. Another one is we stop the cutting down of trees because it is destroying our environment. It is destroying the homes for lots of animals and one day there will be no forests or homes for the animals. There will be no environment for them

or us, so that is why we need to protect our environment.

**Landon Dyke, 5th, Elydale Elementary, Mr. DiVirgilio**

There are many ways to protect our environment. One way we can protect our environment is riding bikes. Riding bikes does not put off harmful fumes like cars do. Also, riding public transportation is another good way. Carpooling is a smart and efficient way to protect our environment if you have friends you work with at the same office or building. Those were some suggestions for protecting our environment.

**Zac Gibson, 6th, Yuma Elementary, Ms. Mullins**

I can help protect the Earth by not killing animals. People should clean up after themselves. People shouldn't chop down trees and litter. People should make sure to replant trees.

**Danica Ford, 2nd, Nickelsville Elementary, Mrs. Gilmer**

Some ways to help our environment are to pick up litter, save paper, and to save water. We can help the sea and the ground by picking up litter. You should pick up litter so animals don't eat it. It will make a difference for our eco system. We should save paper to save trees. You could use the back of the paper so you have more paper. Don't waste paper. We should save water. We could save water by turning off sinks and taps. Don't pour out water when you get it. These are some ways to help the environment.

**Max Taylor, 2nd, Hilton Elementary, Mrs. Edwards**

There are so many ways we can protect our environment. For instance, picking up your trash would be a great idea. Cars are destroying our environment. Cars are one of the main reasons our Earth is unhealthy. When the gases of cars fill the air, it pollutes the air. When trash pollutes the water, our food source gets lower. We need to care more about the world because one day, it could be gone.

**Katie Bear, 8th, Jonesville Middle, Mrs. Brooks**

One way to protect our environment is to save paper because billions of trees are being cut down for paper. Next, we also need to drive fewer vehicles that cause pollution because it's really bad for the air that we breathe. Third, don't pour chemical waste into lakes, creeks, and the oceans because that causes animals to die. Also, please do not cause forest fires because animals would get injured or killed. Last, don't litter or throw stuff into the water because that's the water we drink and also animals get caught in the stuff we throw in the water. These are the things we need to do to protect the environment.

**Emily Lane, 6th, Yuma Elementary, Ms. Mullins**

Do you think that we should take care of our planet? I think we should. Here are three ways to take care of our planet. Encourage people not to litter. Littering is very bad for our planet. Stop cutting down trees. Trees produce oxygen. You don't want the world to be filled with toxic air. Pick up trash to help too. I hope you will use my advice.

**Natalie Weiss, 4th, Miller Perry Elementary, Ms. Jeffers**

Our environment is important to us and the animals. We need to protect it. I won't cut down trees because trees make homes for the animals. I will not dump trash on the soil. I won't dump chemicals in the water so our water will not be polluted. That is how I will protect the environment.
