THURSDAY
Science

FRIDAY
Character Education

1

Find an example of an athlete demonstrating good sportsmanship and explain why you think so. What athletes are not good sports? Why do you think so?

2 3

4

Clip and label an example of each of the following: index, byline, cutline, dateline and headline.

5

Identify problems and list them in the order of importance in your community, region, state or nation. What are possible solutions to these problems?

6

Find Christmas gifts you would like to receive in newspaper ads and inserts and add up their total cost. Will your parent(s) be willing or able to afford the gifts?

7

It's said that Santa brings presents from his home at the North Pole. Find fun or serious stories about Santa and the North Pole. How do the stories compare with what the North Pole is really like?

8

Identify countries that are at war. Have students determine to what extent scientific factors (natural resources, climate, overpopulation, etc.) are involved in the conflict, if at all.

9 10

11

Find one or more words in the newspaper with many syllables. Make as many shorter words from the word(s) as you can.

12

Find the names of 10 cities outside the United States in today's newspaper. Locate the cities on a world map. Which city is the farthest from your town.

13

From the weather map, list temperatures from lowest to highest. Figure medians, averages of an area. Find the difference between selected cities, lows and highs. Make a line graph.

14

Find stories on Ocean foods, ocean pollution, offshore drilling or fuel refineries. Using data from the article, write an editorial on the importance of the ocean environment to the future of mankind.

15

According to the index, what pages are the following found on: classified ads, sports, editorials, local news, weather, and the crossword puzzle?

16 17
