If I could make a robot, it would be called Helfut. My machine would look like me. It would have mops for hands. He would clean my bathroom. My invention could clean my entire house. It would be the best invention ever made.
Jessey Johnson, 2nd, Hilton Elementary, Ms. Edwards

If I could invent a machine that would do a chore for me, it would be a machine that picks up my toys before bed. My machine would roll over the toys and suck them up. Then, my machine would put the toys into a box. It looks like a slider with tubes on it. It would save me from a mess before bed.
**Aber Bellamy, 2nd, Hilton Elementary, Ms. Edwards**

If I had a machine to do a chore it would be cleaning my room. It would put my toys in my toy bin. It would make my bed. It would put my clothes up. It would put my books in ABC order. It would sweep my floor. Those are what chores my machine would do.
Jayden Edwards, 2nd, Hilton Elementary, Ms. Edwards

I want my robot to clean my room. The color of my robot will be red. My robot's name is Cleany. He will wake me up in the morning and start cleaning my room. I enjoy how he cleans.
Anastasia Lumpkins, 2nd, Hilton Elementary, Ms. Edwards

Invent a machine to do a chore for you.

If I had a machine to do chores, it would be cleaning the kitchen. It would clean up the table. It would sweep the floor and mop the germs off the floor. It would look like an alien. It's very nice to have a machine to clean the kitchen.
Brandon Stallard, 2nd, Hilton Elementary, Ms. Edwards

If I had a machine to do a chore, I would invent one to make my bed. It would put a blanket on me, fluff my pillow, and get a pillow for me. Whenever I lie on my bed it will give me a million dollars. If I had a machine to make my bed, I would be happy.
Raegan Amyx, 2nd, Hilton Elementary, Ms. Edwards

I would like my machine to clean the dishes. The color of it is black. It will clean dishes for everybody. It will put the dishes on the shelf. The machine cleans every bit of food off of the dishes and puts them all away in the right place. This is the machine I would like to have at my house.
Kimber Raby, 2nd, Hilton Elementary, Ms. Edwards

I would like a machine to clean my room every time it gets messy. My machine would be gray with a clear screen. It has a square head with the screen on it. It can talk and listen. It will hear what I want it to pick up in my room. It has to dust, mop, vacuum, and sweep. It has wheels on the bottom to make it move from side to side. My room gets a deep clean once in a while. If my room is not messy, it only has to clean for ten minutes. If it is messy, it has to clean for two hours. It will clean four times a week. The days it has to clean are Monday, Wednesday, Friday, and Sunday. My machine would be so cool!
Maylee Hall, 2nd, Hilton Elementary, Ms. Edwards

I would like my machine to make my bed. My machine will be purple. She will have a basket on her back to put the stuffed animals in. she will have a place to put my favorite pillows. I will have her put my sheets on her back then she will put them on the bed. I will put her where she needs to be after I turn her off.
Molly McMurray, 2nd, Hilton Elementary, Ms. Edwards

I would like my invention to clean my bedroom. It would have blue hair. It would have a red, white, and blue shirt and pants. It would wear blue shoes with lightning bolts on the side.
Willie Neeley, 2nd, Hilton Elementary, Ms. Edwards

If I could make a machine to do my chores, the chore would be doing my homework. My machine would look like me so I can play without my mom telling me to do my homework. Every day my machine will charge until I get back from school. This machine is the best. It will also clean my room.
Landri Carter, 2nd, Hilton Elementary, Ms. Edwards

I would like my machine to make my bed for me. The machine would look like my mom. It would be very blue and yellow. This is how it works: when I say, "Make my bed," it calculates what I say. When I say something, it is programmed to do what I say. This is how my machine works.
Tristan Lewis, 2nd, Hilton Elementary, Ms. Edwards
